Summary

Data Analyst with hands-on project experience in SQL, Python, and Power BI. Built dashboards that turned 100K+ raw records into real business findings, including 13.59M in e-commerce sales trends and customer segments with over 80% churn risk. AWS Certified Cloud Practitioner with practical exposure to S3, EC2, and IAM. Looking to bring this same hands-on approach to an entry-level Data Analyst role — translating raw datasets into clear, actionable insights and forecasts that support business planning and decision-making.

Skills

Data Analysis & Analytics: Data Cleaning, Data Preparation, Exploratory Data Analysis (EDA), Statistical Analysis, Data Validation, Data Interpretation

Programming & Querying: SQL (MySQL, SQLite), Python, Pandas, Excel

Data Visualization & Reporting: Power BI, DAX, Power Query, Dashboard Development, KPI Tracking, Matplotlib, Seaborn

Cloud & Tools: AWS (S3, EC2, IAM, VPC, RDS), Git

Projects

E-Commerce Business Intelligence & Sales Analytics | SQL, MySQL, PowerBI

- Developed an end-to-end Business Intelligence solution by importing and analyzing 100K+ e-commerce records (99K orders, 96K customers, 113K+ products) in MySQL, performing SQL-based analysis using joins, aggregations, window functions and filtering to extract revenue trends, payment behavior, and delivery performance insights.
- Built a 5-page Power BI dashboard using Power Query, star schema modeling, and 25+ DAX measures across 13.59M in total sales, key findings: Health Beauty top revenue category, Sao Paulo highest regional revenue, Credit Card most used payment method, avg. delivery 12 days.

Bank Customer Churn Analysis Dashboard | Python (Pandas, Matplotlib, Seaborn), SQL, PowerBI

- Cleaned and analyzed 10,000 customer records using Python and SQL, isolating 10 churn factors and identifying Age, Activity Status, Geography, Products Held, and Balance as top predictors (e.g., senior customers churned at 51%, Germany at 32%).
- Designed a 4-page Power BI dashboard with KPI tracking and risk segmentation, surfacing high-risk segments (e.g., Senior + Germany + Inactive, churn over 80%) to support retention strategy decisions for stakeholders.

Retail Sales Data Analytics Pipeline | Python, Data Analysis, AWS S3, QuickSight

- Automated KPI generation (Total Sales, Revenue, Category and Regional Performance) by building a Python and Flask pipeline that handled data cleaning, feature engineering, and validation, eliminating manual effort across ingestion, preprocessing, and reporting.
- Delivered stakeholder-ready dashboards and PDF reports by integrating AWS S3 for cloud storage and Amazon QuickSight for visualization, supporting business planning and forecasting decisions.

Education

Master of Computer Applications (MCA) - AI & Data Science 2024-2026

D. Y. Patil International University

Bachelor of Computer Applications (BCA) - Cloud Computing 2021-2024

D. Y. Patil International University

Certifications

- Deloitte Data Analytics Job Simulation (Forage, 2025)
- Google Analytics Certification (Google, 2024)
- Complete AI & Machine Learning, Data Science Bootcamp (Udemy, 2024)
- AWS Certified Cloud Practitioner (AWS, 2026)
